LEADERSHIP & COMMUNITY PROFILE

AI Engineering undergraduate at NUST and student founder with a track record of leading civic-tech ventures, running community outreach programs, and competing in national AI hackathons. Experienced in translating technical ideas into accessible pitches for diverse audiences. Eager to bring that same energy to building an active AI-builder community at NUST as a Claude Campus Ambassador.

CAMPUS LEADERSHIP & OPERATIONAL STRENGTHS

- **Community Mobilization:** Experienced in running campus student ventures, community outreach with Sunbeams Pk100, and peer-to-peer developer coordination.
- **Public Speaking & Pitching:** Client-facing negotiation background through Win Win Marketing; technical demo presentation experience at NIC Quetta and hackathons.
- **Event & Workshop Execution:** Proven capability to host hands-on tech sessions, guide peers on API/tool integrations, and coordinate campus demo nights.
- **Technical Foundation:** Python, Docker, Agentic AI (LangGraph/LangChain), Vision-Language Models, and open-source model experimentation.

EDUCATION

National University of Sciences and Technology (NUST) <i>Bachelor of Science in Artificial Intelligence</i> CGPA: 3.47 / 4.00	Pakistan Sep. 2024 – Sep. 2028
Metropolitan International United College (MIUC) <i>Higher Secondary School Certificate (HSSC)</i> FBISE: 83.4% (Gold Medalist)	Islamabad, Pakistan Sep. 2022 – Aug. 2024

LEADERSHIP, SOCIAL IMPACT & OUTREACH EXPERIENCE

Volunteer IT Fellow & Outreach Contributor <i>Sunbeams Pk100 Network (Pakistan 100 for 100 Summer Challenge)</i>	Jul. 2026 – Aug. 2026 Islamabad, Pakistan
– Contributed to the 210 School Portfolio Web Pages Project, performing digital verification, data validation, and portfolio curation across nationwide community partner schools.	
– Compiled and presented end-of-program analytical reports assessing digital inclusion metrics and institutional needs across regional partner schools.	
Part-Time Sales & Marketing Executive <i>Win Win Marketing & Developers (Pvt) Ltd</i>	2026 – Present Islamabad, Pakistan
– Spearhead strategic client communication, product presentations, and promotional drives for real estate and infrastructure ventures, including Faisal Town Group developments.	
– Facilitate direct stakeholder engagement, pitching project value propositions to diverse client groups and managing follow-up pipelines.	
Founder & Team Lead <i>Aqualytica (HydroScan) – Incubated at NIC Quetta (Cohort 14)</i>	Jun. 2025 – Nov. 2025 Quetta, Pakistan
– Founded and led an IoT-based civic-tech venture delivering real-time potable water quality assessment for under-resourced local communities.	
– Directed cross-functional team coordination, student stakeholder interviews, and product presentations to secure startup incubation at the National Incubation Center (NIC).	
– Delivered technical product demos and stakeholder pitches to incubation mentors, community representatives, and academic leadership.	
Co-Founder <i>Hassle-Free Printing Business</i>	Nov. 2025 – Present Quetta, Pakistan
– Co-founded a student-facing printing service addressing campus academic material accessibility, serving hundreds of students weekly.	

STUDENT COMMUNITY ENGAGEMENT & HACKATHONS

Alibaba Cloud AI Hackathon Pakistan (Bano Qabil) <i>National Finalist</i>	Aug. 2026
– Co-designed Dawae-Check , a vision-based verification platform detecting counterfeit pharmaceutical packaging using fine-tuned VLM architectures.	
– Collaborated with student developers and organizers across academic hubs nationwide to demonstrate practical AI applications addressing local societal challenges.	
FortyGuard Global Heat Intelligence Hackathon <i>Project Contributor (Team ZeroKelvin)</i>	Aug. 2026
– Contributed to ThermaX OS , integrating multi-agent reasoning pipelines with environmental sensor APIs to predict urban thermal hotspots and suggest mitigation measures.	

TECHNICAL PROJECTS & DEVELOPER TOOLING

Autonomous Coding Agent & LLM Firewall Frameworks | *LangGraph, Python, XGBoost*

2025 – 2026

- Built an autonomous coding agent with closed-loop debugging execution to run iterative runtime corrections without human intervention.
- Developed **Sentinel AI**, an adversarial prompt injection firewall evaluating inputs in <50ms, demonstrating responsible AI deployment practices.

Private Distributed Compute Grid | *Dask, Docker, Tailscale Mesh*

Mar. 2026

- Configured networked lab workstations into a distributed compute cluster to train ML workloads in parallel, eliminating external GPU costs.
